Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In response to applicant's election dated October 18, 2004. The following action is taken:

Applicant's election without traverse of claims 15-120 in the reply filed on October 18, 2004 is acknowledged.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 15-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Yokota et al (6058091).

The pre-amble of the independent claims merely read on recoding sampled signals on a disk (CD data), reading the sampled data on the disk from plurality of regions (entire disk surface is merely a plurality of regions), controlling the readout to read each region individually of combining the signals from the regions of the disk to read the signals (alternative limitation). The reference shows an optical disk reading apparatus having a disk with a plurality of regions 9 and 10 with sampled data recorded thereon column 39 lines 25-40 and column 40 lines 37-55 or columns 49 and 50 having different data channels. The reference also shows the use of a synthesizer 141 and 142 to synthesize the data read from the CD-DA and the CD-ROM regions of the disk.

Art Unit: 2655

With respect to the limitations of claims 16 and 17. The reference shows the use of a plurality of heads to read a plurality of data regions on the disk 12-15 of fig 7.

With respect to the limitation of claim 18. the reference shows the use of a single head 70 having n-rate (n being from 1 to infinity) reading data at an n rate (any rate from one to infinity).

With respect to the limitation of claim 19. The claim is drawn to a multi-layer disk as cited in column 48 lines 1-10.
